**West Star Aviation, Inc. Performs First 30 Year  
CPCP Inspection on Falcon 50**

**East Alton, IL, September 25, 2007**– West Star Aviation, Inc., formerly Premier Air Center, is currently performing one of the first, 30-Year Corrosion Prevention Control Program (CPCP) inspections on a Falcon 50. The East Alton, Illinois location is completing the CPCP inspection on Falcon 50, s/n 088 combined with a “4C” airframe inspection.

Compliance with Dassault Service Bulletin 460, and the requirements for application of the CPCP on a Falcon 50 to maintain airworthiness beyond the aircraft's 30-year service life, is critical to the continued operation of Falcon 50 aircraft.

“Being one of the first to complete this inspection expands our already industry leading experience on Falcon aircraft,” says Jim Swehla, Executive Vice President Sales and Marketing, West Star Aviation, Inc. “Our deep experience allows us to more accurately provide pricing and down time estimates to operators. We can now share more of our working knowledge and technical expertise when dealing with customers and completing Service Bulletin 460 on Falcon 50 aircraft.”

The inspection entails compliance with lists of service bulletins, Chapter 5-10 requirements, Chapter 5-40 requirements, and research of Modified PSE's.

With locations in East Alton, Illinois, Grand Junction, Colorado, and Dallas, Texas, West Star Aviation, Inc. represents the very best in aircraft maintenance capability and services. The location at St. Louis Regional Airport (ALN) in East Alton, IL is a Factory Authorized Cessna Citation Service Center for all 500 and 650 series aircraft including the Sovereign, Mustang and
