WEST STAR AVIATION COMPLETES FINAL PHASE OF DALLAS EXPANSION

Dallas, TX, July 31, 2009 – In an effort to better serve their clients, West Star Aviation, Inc. is pleased to announce that they are in the final stage of a planned service capabilities expansion and facilities consolidation at their Dallas Love Field (KDAL) location.

The renovated 50,000 square foot facility will be able to accommodate today's most sophisticated corporate aircraft for maintenance, avionics repair/installation, interior refurbishments and minor paint activities. The renovation of the Lemmon Street facility incorporated and consolidated all activities offered at the original location, and includes new pilot lounges, planning areas, secure storage, technical shop space and other physical improvements.

“This final phase allows us to offer our industry acclaimed technical service at one easily accessible location with reduced ramp and street side congestion,” says Susie Corn, Dallas Director of Operations. “Part of this final phase will involve the closing of the Cedar Springs Road facility which will no longer be needed. We will, however, continue to provide Line Maintenance for transient customers at that location.”

The Dallas location specializes in maintenance for Citations, Hawkers, Beechjets, King Airs and Learjets. It is also a factory authorized Embraer Phenom, Cessna Citation 500 and 600-series and Citation Mustang Service Center, operates as an authorized FAA certified repair station 5PAR631Y and is EASA approved, reference 145.6049.

For Immediate Release

West Star Aviation, Inc. specializes in airframe repair and maintenance, engine repair and maintenance, major modifications, avionics installation and repair, interior refurbishment, paint, parts, surplus avionics sales, and accessory services. In addition to its facilities in East Alton, IL; Grand Junction, CO; and Dallas, TX, West Star Aviation has a Hiawatha, IA location that specializes in the acquisition and sales of surplus avionics and runs the maintenance operations at Aspen-Pitkin County Airport in Aspen, CO. The company also provides complete FBO services for transient aircraft at its newly remodeled East Alton and Grand Junction facilities. West Star Aviation, Inc. is an industry leader in technical experience and expertise and provides world-class customer services in all of the organization's divisions.
