**WEST STAR AVIATION’S WINDOW REPAIR TEAM RECEIVES VENDOR APPROVAL
FROM ECLIPSE AEROSPACE, INC.**

Grand Junction, CO, October 10, 2011 – West Star Aviation recently announced they are now an approved vendor for all window repairs on the Eclipse Twin-Engine Jet. West Star relies on the proprietary techniques of their “in-house” team of professionals to repair Eclipse Jet windows.

The approval process began in August 2011, when Eclipse Aerospace completed a new window repair process with the assistance of West Star Aviation’s Window Repair Experts, who have over 38 years of experience. Then, in September 2011 West Star Aviation’s Window Repair Team traveled to San Antonio, TX to perform the first Eclipse Jet windshield repair. The repair was completed with great success and saved the operator an estimated \$65,000.

“I was amazed at the final results. The windows were in horrible condition before the repair, I could hardly see out of them,” says Tim Musgrave, Owner and Operator of the repaired Eclipse Jet. “Now they look like new. The West Star window repair team was professional and they helped save me a lot of money over the replacement cost!”

West Star’s Window Repair Team will travel anywhere worldwide to repair and install windows. To request additional information or schedule services contact Jack Brown, Aircraft Window Repair Program Team leader (GJT), at (970) 243-7500 or 800-255-4193.

West Star Aviation, Inc. specializes in the repair and maintenance of airframes, windows, and engines, as well as major modifications, avionics installation and repair, interior refurbishment, surplus avionics sales, accessory services, paint and parts.
