West Star's Scottsdale satellite location is located at Scottsdale Airport (SDL) and provides maintenance support for Scottsdale and Phoenix Metropolitan airports.

SDL's satellite location offers AOG/MRT aircraft services in the entire Scottsdale and Southwestern region of the US.

When necessary, satellite locations utilize resources for one of the four full-service MRO facilities located in East Alton, IL (ALN), Grand Junction, CO (GJT), Chattanooga, TN (CHA), and Perryville, MO (PCD).

Our highly trained and experienced technicians at each satellite location can aid in troubleshooting problems and providing solutions that are best suited to get you back in the air as quickly as possible. They can even assist in obtaining ferry permits if relocating your aircraft to one of our full service locations is necessary.

- **Minor Repairs And Inspections Including A Checks And 12/24 Month Inspections**
- **AOG/MRT - Aircraft, Engine And Avionics Troubleshooting/Repair**

For specific services, models and ratings by location call or visit www.weststaraviation.com for details.
